# HOORAY!

Your media player is here - now what?

STEP 1: Hook it up

POWER: Plug power cable into the USB-C port on the device (DO NOT plug into the wall yet!).

ETHERNET: Then plug in your network cable to the Ethernet port on the device.

**HDMI:** Lastly, plug in your HDMI cable that should also be plugged into the HDMI port on your display.

USB-C

Ethernet

HDMI

STEP 2: Power it up

NOW you can go ahead and plug your media player into the power outlet.

LIGHTS!

Check for the blue light on the media player to indicate the power is on.

Look for the solid green light on the Ethernet port to indicate you've got a good connection.

STEP 3: Create it up

While you were looking at all the pretty lights, your screen has probably cycled through a few things which include an Android boot, pausing on the home screen then opening the software and displaying your content.

This cycle should take between 2-5 minutes.

You did it - high five!
